

SYMPOSIUM ON THE ACOUSTICS OF PORO-ELASTIC MATERIALS
7-10 November 2023, Sorrento (Italy) & Changshu (China)

SPONSORSHIP FORM

The objective of SAPEM conferences is to gather a limited audience of academic researchers and industrial partners to review the research results and the expertise acquired so far regarding the acoustics of porous media.

The aim is also to cover not only theoretical and experimental knowledge about porous materials but to provide time to present and to discuss examples of industrial applications and point out problems encountered by consultants and industries.

The highlighted topics for SAPEM '23 edition are :

- Manufacturing
- Natural materials
- Multi-functional materials
- Multi-scale / multi-dynamic materials
- Underwater / sea-floor modelling or characterization
- AI / ML for modelling, characterizing or design
- System level as opposed to component level, towards integration
- Measurement techniques & characterization,
- Modelling
- Numerical techniques
